FOR IMMEDIATE RELEASE

## Recertification received to the ISO 9001:2015 Standard demonstrates continual commitment to quality production

**05 August 2021 Houston, Texas:** 3D Metalforge (ASX: 3MF) (“3D Metalforge” or the “Company”), has been recertified to the ISO 9001:2015 standard by the internationally accredited certification body, DNV, a leading certification, assurance and risk management provider. The ISO 9001:2015 certification is valid for Additive Manufacturing of metal and non-metallic parts and components including CAD design, production and post-production activities.

Certification to international standards demonstrates 3D Metalforge’s commitment to continual improvement and sustainable business performance. This achievement communicates the commitment to help build stakeholder and customer trust, and brand confidence.

3D Metalforge will continue to gain the benefits of ISO 9001:2015 certification including increases in business efficiency, greater reliable quality of processes and products, and higher levels of customer satisfaction. Additional benefits come from being perceived as a qualified supplier, required on many customer contracts, and widely used as a supply-chain requirement.

“3D Metalforge will continue to work toward providing greater value to our customers through new and innovative manufacturing solutions. All the while we work to make a “greener” more sustainable world, providing customers with better additive manufacturing solutions that help meet their changing supply chain, sustainability, and component manufacturing challenges. This qualification will support us in our discussions with partners and future customers, many of whom are large international firms requiring these qualifications” said Matthew Waterhouse, CEO 3D Metalforge.

- ENDS -

This announcement has been approved for release by the Managing Director of 3D Metalforge Limited.
